# Rainbow Classroom
## Creating a collaborative learning experience, anywhere

Rainbow Classroom is a **European-hosted and developed remote learning platform** designed with teachers, for teachers.

It delivers **active, impactful learning** to your **educational community**, both remotely and on premises simultaneously.

The main driver is to **empower educators and trainers to focus on teaching** rather than the technology — using an intuitive and powerful interface.

**Students are able to reach their full potential** and perform to the best of their ability through a streamlined and **active learning environment**.

This results in an **enjoyable, highly-effective, and collaborative learning experience** for everyone involved.

## Overview

# Rainbow Classroom
## Creating a collaborative learning experience

- **Environment:** choose the environment which fits the type of organization you are going to use Rainbow Classroom in.
- **Deployment:** choose which way you want Rainbow Classroom to be deployed – via LMS integration if you are already using or plan to use a learning management system or standalone if you are only looking for a remote learning platform.

# For Education
## At a glance

**+**

**Extend**

**Engage**

**Educate**

**For teachers and students across the globe**

- **Rainbow Classroom seamlessly extends the physical classroom to an active, collaborative learning environment, both online and hybrid**

- **Creates a closer personal interaction between teacher and student which improves the participation experience and helps students reach their potential**

- **Results in a more effective learning experience, for students to perform to the best of their ability**

### *Rapid learning curve*

- Native integration and access through existing known software means no class down-time or on-boarding

- Fast roll-out and deployment

### *Highest security standards*

- Teacher and student privacy are protected by best-in-class encryption mechanisms

- ISO 27001 certified sessions on-the-fly

### *Transparent subscription model*

- Subscriptions are priced per teacher per month

- Student licenses are free of charge

- Very competitive pricing

# For Enterprise
## At a glance

**Engage**

**Educate**

**Collaborate**

- **Rainbow Classroom is a European, cloud-based platform that extends your passive, on-demand training to an active, collaborative learning environment, whether online or hybrid**

- **It creates a closer personal interaction between coach/trainer and attendees as well as powering the collaboration between attendees. The persistent engagement improves the participation experience.**

- **This leads to a more effective training experience, a more valuable workforce, and a better use of the invested time and resources.**

**Enterprise-grade remote coaching platform**

### Full service-continuity

- Equip your employees with the tools they need to infallibly host and join trainings whenever they need to, wherever they are

### Seamless integration

- Rainbow Classroom easily blends in with your existing business processes and applications, but can also serve as a standalone platform

### Unlimited scalability

- Monthly subscriptions let you scale up or down based on your current company requirements

### Transparent subscription model

- Subscriptions are priced per trainer per month
- Trainee licenses are free of charge

# LMS Integration
## At a Glance

**+**

**Powerful integration**

**Automatically synchronised class data**

**Full classroom control**

**Enrich your existing Learning Management System**

- Launch Rainbow Classroom directly from your LMS and discover how you can benefit from natively embedded collaboration and communication capabilities

- Benefit from a closed learning environment with no unauthorised access – teachers and administrators must invite students to join a class

- Existing data from your LMS is automatically synchronised and transfered to Rainbow Classroom when creating a class, adding students, or starting your virtual classroom

- Rainbow Classroom can connect to any learning management system with an LTI standard interface
