

Rainbow by Alcatel-Lucent Enterprise

Instantly connect and collaborate with your business community

New technologies are revolutionising the way that we communicate and interact. For businesses, the desire to remain competitive and attractive while continuing to deliver superior customer experiences necessitates that we have professional, reliable, and connected business phones in place.

[Rainbow by Alcatel-Lucent Enterprise™](#) is a hybrid collaboration service that empowers organisations and individuals to connect and collaborate efficiently with colleagues, business contacts, and customers, while leveraging your existing telephony investments.

Whether handling project details, answering customer questions, or providing quick resolutions, your team can do it all through Rainbow. With instant messaging, high definition audio or video conferences, and seamlessly created collaborative workspaces or groups, participants can securely share large files and host web conferences on the fly.

Rainbow by Alcatel-Lucent Enterprise is the hybrid collaboration service from ALE

Available on desktop, web, smartphone, and tablet, Rainbow's key collaboration capabilities connect all your employees regardless of where they are situated, making it the perfect solution for effective remote working.

Extremely simple to deploy, Rainbow protects your existing investments and provides encrypted communications and data storage in data centers located in high privacy-conscious countries.

Rainbow also offers unlimited customisation capabilities with numerous Application Programming Interfaces (APIs) and Software Development Kits (SDKs) open to any developer. Rainbow hybrid services can be integrated into a website (for example, a customer portal to reach sales or support teams) or integrated into any mobile application to provide augmented interactions with end-customers.

Value proposition for end-customers

- **Speed up your digital transformation** through truly mobile cloud-based communication, intuitive user collaboration, seamless deployment, and consistent design that boosts user-adoption
- **Leverage investments and connect your telephony system** with no rip-and-replace requirements. Rainbow offers a hybrid cloud that leverages your investments in PBX telephony systems by easily connecting them to the cloud and providing unified presence, desk phone click-to-call and softphone capabilities, and multimedia conferencing
- **Increase business process productivity** through the Rainbow Developer Hub. A Communications Platform-as-a-Service (CPaaS), the Hub provides integration capabilities into existing business applications, web sites, mobile apps, and workflows through various APIs and SDKs.
- **Flexible pricing models adapted to your needs** with usage or per-user subscription levels for audio conference. Pay-as-you-grow with API consumption on the Developer Hub.

Rainbow service plans

Rainbow Essential: This free option is available to anyone who wants to try Rainbow for an unlimited period (no SLA). The Essential subscription can also be blended with any premium subscription, optimizing the cost of the solution for the whole organization.

Rainbow Business: The per-user subscription addresses individuals and teams who want to improve their daily communication, on- or off-site, on-the-move, or as a productive remote worker.

Rainbow Enterprise: The per-user subscription includes all services from Rainbow Business, but with the addition of collaborative multi-party services with video conferencing and extended file storage. Integration into existing office tools such as Microsoft 0365 and Google Suite also forms part of this service plan.

Rainbow Enterprise Dial-In Pack: The per-user subscription package including Rainbow Enterprise capabilities with unlimited phone conferencing minutes. It is a monthly or multi-year (pre-paid for a period of one year, three years or five years) subscription.

Rainbow PSTN Dial-In Service: An optional service proposed as a “pay-as-you-go” model for phone conferencing with a price-per-minute/per-connection. Option available with the Enterprise subscription.

Rainbow Connect: The per-user subscription addresses users of any Customer Relationship Management (CRM) application. The integration of the Rainbow functionality is provided using a specific connector dedicated to the compatible CRM application.

Rainbow Room: An optional per-room subscription proposed for meeting rooms equipped with large screens for communication and interaction with people inside and outside of the company. Additional hardware is required to equip the meeting room and ALE has audio and video hardware kits readily available.

Rainbow Alert: This subscription provides access to Rainbow Alert solution and helps manage critical situations more efficiently, and significantly reduces operating cost as it replaces out-of-date pager systems.

 - Bypassing of Rainbow and native system "Do not disturb" status
 - Persistent visual notifications and audio beeps
 - Alert acknowledgment

Rainbow Telephony connector for MS Teams

Rainbow Alert

Rainbow for Developers is an open CPaaS with a set of APIs and SDKs that allow any developer to integrate the powerful Rainbow collaboration tool into existing in-house applications, both web and smartphone based.

Rainbow for Developers makes digital transformation easy by providing extensive APIs, documentation, and support so that developers can build applications that connect humans, things and apps, transforming the way they communicate and collaborate.

The service allows a developer to:

- Add real-time interaction and multimedia capabilities to any web or smartphone application
- Automate live interactions with AI-powered Bots and Chat Bots
- Integrate Rainbow with any customer's infrastructure or hardware (IoT)

Rainbow for Developers offers more than 300 APIs, based on industry standards for chat, video, multimedia and provisioning services.
